

SafeBirth Network
DELIVER WITH CARE

Digital Tool for Safe Childbirth in Crisis Settings

Problem Statement

Theme: Health

- 24 million women a year have to deliver without any skilled attendance
- Every day, 830 women and girls die from complications related to pregnancy and childbirth, with 99% of these deaths occurring in developing countries

Why?

- These women are

Existing Platforms

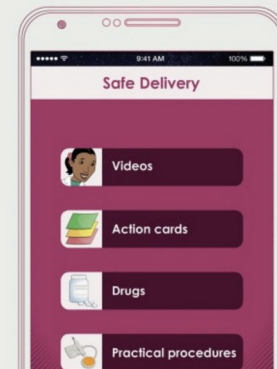

PROJECT

Mobilizing Maternal Health (m-mama)

THE SAFE DELIVERY APP

AN EMERGENCY TRAINING TOOL

Their limitations

- Reliance on Wi-Fi connectivity
- Dependence on road transport
- Variable availability of drivers
- For delivery the patient is not in direct contact with the hospital
- No continuous support

What makes us stand out

- Offline-first design using mesh networking
- End-to-end maternal care in one system
- Trained community birth facilitators
- Three connected user interfaces:
 - Pregnant women
 - Community birth facilitator
 - Medical facilities
- No existing platform combines offline emergency signaling, community-based birth assistance, medical facility oversight, and automated drone-based supply delivery.

SafeBirth Network
DELIVER WITH CARE

Business model

- Donations
- Corporate sponsorship (drone companies)
- Government sponsorships
- International Funding (The Global Fund)
- B2NGO SaaS Licensing
